

# COVID-19 Update

Situation Update No. 41 at 2 July 2021

# 

**UNITED NATIONS** 

\*

MALAWI

# **MALAWI HIGHLIGHTS**

- More than 385,000 people have received COVID-19 vaccines against a population of about 10.2 million people aged 18 and above, representing (3.8%).
- Malawi has paused COVID-19 vaccinations due to shortage of vaccines.
- World Bank approved \$30 million for COVID-19 vaccines in Malawi.
- Sharp increase in COVID-19 cases, with new cases registered in June (1,788) being more than seven times the new cases registered in May 2021 (248).
- 9,400 testing kits distributed to all central and district hospitals to boost testing.
- Online system to authenticate travellers' COVID-19 certificates rolled out in Malawi.
- \$491,000 worth of surgical masks dispatched to Malawi

### **MALAWI SUMMARY**

- ✤ 36,573 cases; 1,897 active
- \* 33,242 recovered, 1,202 deaths
- 271,193 tests done
- 428,407 vaccines administered

## **GLOBAL SUMMARY**

179,241,734 cases
 3,889,723 confirmed deaths

## **REGIONAL SUMMARY (Africa)**

- \* 5,284,253 cases
- 139,102 confirmed deaths
- 4,673,157 recovered

NB: Malawi Government is reviewing the 2021 COVID-19 Response Plan. Above figures are based on 2020 Appeal.

# **COMPREHENSIVE COVID-19 PREPAREDNESS AND RESPONSE**

COORDINATION Coordinated by: Department of Disaster Management Affairs (DoDMA)	<ul> <li>A <u>calendar of meetings</u>, information <u>repository</u>, <u>5W</u> interactive dashboard and a <u>financial tracking tool</u> are available to support coordination of COVID-19 response.</li> <li>The Humanitarian Country Team meets to support coordination.</li> <li>Activated clusters are meeting to coordinate response activities and share updates.</li> <li>Information relating to COVID-19 resource mobilization, allocation, programmatic implementation (RM and 5Ws) is regularly being updated.</li> </ul>	
HEALTH	COVID-19 SITUATION	
Coordinated by: Ministry of Health (MoH) & WHO	<ul> <li>COVID-19 cases have risen in the last three weeks, with new cases registered in June (1,788) being more than seven times the new cases registered in May 2021 (248).</li> <li>18.3% of COVID-19 tests done on 30 June turned positive compared to 1.5% on 31st May. This is feared to be a third wave of the spread of COVID-19 in Malawi.</li> </ul>	
<b>233</b> new COVID-19 on 1 <sup>st</sup> July is the highest number of new cases since March 2021.	<ul> <li>233 new COVID-19 cases were reported on 1<sup>st</sup> July, the highest number of new cases since March 2021. Currently, Malawi has a total of 36,573 confirmed cases compared to 34,338 cases at the end of May and about 34,090 at the end of April.</li> <li>The recent surge in COVID-19 cases is due to local transmission and imported cases, coupled with general public relaxation on preventive measures.</li> </ul>	

### HEALTH RESPONSE

**9,400** testing kits distributed to hospitals.

**45** rapid response team members trained in tracking and investigating COVID-19 cases.

**7** oxygen plants active out of 12.

**428,407** COVID-19 vaccine doses administered.

\$30 million from World Bank for COVID-19 vaccines in Malawi approved.

- To reduce transmissions, MoH has intensified screening of travellers, testing and contact-tracing, and continues to promote prevention measures.
- Mass testing of people in some prisons as well as communities around Shayona cement and Salima sugar factories was conducted.
- To boost testing, 9,400 testing kits (Xpert cartilages) were distributed to all central and district hospitals, while GeneXpert platforms were installed in Mwanza, Mchinji, and Dedza.
- Baseline assessment for sample repository capacity done with support from I- TECH.
   To enhance laboratory staff capacity, a training of trainers on Antigen RDI (Ad-RDI)
  - To enhance laboratory staff capacity, a training of trainers on Antigen RDT (Ag-RDT) testing a new technology for faster COVID-19 diagnosis was conducted, while capacity building for genotyping is underway
- 45 rapid response team members (27 male and 18 female) have been supported to undergo a COVID-19 refresher training to enhance their skills to investigate, track contacts and COVID-19 related cases in real time. They comprise surveillance, case management, risk communication, laboratory, mental health, and psychosocial support workers from three districts. This is supported by UNICEF.
- Infection prevention and control (IPC) training for 26 medical and nursing staff (18 males and 8 female) to train other staff in health facilities has been supported.
- Piloting of IPC comprehensive assessment tools done in Zomba, Thyolo and Mulanje.
   To improve case management, 30 MoH technical officers (23 male and 7 female) were supported to review the COVID-19 case management manual to include the new evidence related to treatment of COVID-19 cases, with support from UNICEF.
- Oxygen: out of 12 designated facilities with oxygen plants, only 7 are active.

# COVID-19 VACCINES

- 428,407 COVID-19 vaccine doses have been administered, with 385,242 and 43,165 people receiving their first and second doses as of 30<sup>th</sup> June, respectively.
- A shortage of COVID-19 vaccines in Malawi has been reported.
- Malawi awaits delivery of the remaining 900 000 vaccine doses from COVAX facility, having received the first batch of 360,000 doses from the facility in March.
- Malawi also received 102,000 COVID-19 vaccine doses from the African Union and 50,000 doses from the Indian Government, bringing the total of vaccines received to 512,000. Some 19,610 expired vaccines were incinerated in May.
- World Bank has approved \$30 million for acquisition and deployment COVID-19 vaccines in Malawi. This additional financing brings the bank's total contribution to Malawi's health sector COVID-19 response and vaccinations to \$37 million.
- Vaccine uptake significantly increased in June due to high risk perception on a possible third wave and the decline in vaccine fears and mistrust, compared to March – May when vaccine uptake was slow due to information gaps, hesitancy and change in some rollout schedules that caused confusion.
- Malawi plans to immunize 3.8 million people by the end of 2021.

### DIGITAL VERIFICATION OF TRAVELLERS' COVID-19 TEST CERTIFICATES

- Malawi has rolled out an online system to verify COVID-19 certificates of travellers at all entry points in line with the Trusted Travel (TT) framework to ensure integrity of COVID-19 test certificates and prevent cross-border spread of the disease.
- The system is being implemented in collaboration with African Union and Africa CDC, and with technical support from PanaBIOS Consortium.
- Five laboratories at Community Health Sciences Unit (CHSU), and Kamuzu, Queen Elizabeth, Mzuzu and Zomba Central Hospitals are issuing COVID-19 test results with special TT codes that can be verified by airline and port health authorities.
- No traveller will be allowed to depart Malawi without verifying their COVID-19 test certificate from 1<sup>st</sup> July, and those coming to Malawi must also show similar codes for their certificates, according to MoH.

	TRANSPORT AND	*	<b>48,961 cloth masks were delivered to Blantyre, Dowa and Lilongwe</b> for further distribution to nutrition care group promoters, supported by UNICEF.
	LOGISTICS	*	Surgical masks valued at \$491,000 (29,000 x 50 packs) were dispatched to Malawi
		for handover to the Ministry of Health, supported by UNICEF.	
Coordinated by: Ministry of Transport and Works & WFP.	*	5 mobile storage units (MSUs) were deployed for use by the Malawi Blood Transfusion	
		Services (MBTS) in Blantyre, Mzuzu and Lilongwe.	
	*	Transportation of MSUs from Dzaleka Refugee Camp was supported.	
	UIKS & WFF.	*	The National Logistics Cluster had received \$395,000 from Iceland and \$500,000 from
			Malawi SDG Acceleration Fund as of end of May 2021, leaving a shortfall of \$800,000
			required for the cluster to continue providing its services to the beneficiaries.

INFORMATION &	Vaccine Deployment Plan was reviewed to integrate a Publicity and Demand Creation strategy focusing on motivating people to accept vaccines.
	<ul> <li>Multimedia materials with key messages on positive testimonies from people who</li> </ul>
-	were vaccinated are being developed by UNICEF to encourage vaccine uptake.
Coordinated by:	Public announcements promoting general COVID-19 vaccine uptake and
Ministry of Information (MoI)	<ul> <li>encouraging people to receive the second dose were aired in May and June.</li> <li>Public engagement efforts on COVID-19 prevention and vaccines through digital</li> </ul>
	media platforms reached over 100,000 people.
	Message development session to address emerging issues on COVID-19 and to
	increase uptake of the vaccine was conducted.
140	<ul> <li>CSOs were lobbied to support COVID-19 vaccine demand creation efforts.</li> <li>The public continued to access COVID-19 information through multiple platforms,</li> </ul>
